Forward-Looking Statements

This annual Management Report of Fund Performance contains forward-looking statements ("FLS"). FLS are statements about possible events, conditions or results of operations that are based on assumptions about future economic conditions and courses of action. FLS includes future-oriented financial information about prospective results of operations, financial position or cash flows that is presented either as a forecast or a projection. Future-oriented financial information is FLS about prospective results of operations, financial position or cash flows, based on assumptions about future economic conditions and courses of action.

FLS can be identified by the use of forward-looking words, including: "may", "will", "should", "expect", "anticipate", "target", "project", "estimate", "intend", "continue" or "believe". Similar other words may also be used. Actual performance of the Fund may be materially different from the performance reflected or contemplated in the FLS. The risks factors that may impact actual performance are discussed under the heading "What are the Risks of Investing in the Fund's Simplified Prospectus.

Investors are also cautioned that FLS is based on a number of factors and assumptions, including a Fund's current plans, estimates, opinions and analysis made in light of its experience, current conditions and expectations of future developments, as well as other relevant factors. These factors can change over time. Before making any investment decisions, we encourage you to consider these and other factors carefully. All opinions contained in FLS are subject to change without notice and are provided in good faith but without legal responsibility.

ANNUAL MRFP

Management Discussion of Fund Performance for the year ended February 28, 2025

This report provides YTM Capital's view of significant factors and developments impacting YTM Capital Fixed Income Alternative Fund ("Fund") and information about the Fund's performance and operations. The report covers the period from March 1, 2024 to February 28, 2025 ("Year"). YTM Capital Asset Management Ltd. ("YTM Capital") is the Fund's investment fund manager, trustee and portfolio advisor. Net asset value ("NAV") refers to the value of the Fund. All monetary financial information is reported in Canadian dollars and is expressed in millions, unless otherwise indicated.

Investment Objective and Strategies

Investment objective: The Fund seeks to provide maximum risk adjusted returns over the long term and to preserve capital, by investing primarily in fixed-income securities, cash, and by entering into derivatives arrangements. It uses alternative strategies including short sales, cash borrowing for investment purposes, and derivatives, in the process creating leverage. The maximum aggregate exposure created by leverage is 300% of the Fund's net asset value, unless otherwise permitted by securities legislation.

Investment strategies: The Fund generally uses three core investment strategies to seek its investment objective: (i) carry trades; (ii) active trading; and (iii) new issuances. For more information about these strategies, refer to the Fund's simplified prospectus ("Prospectus").

Risk

The risks associated with investing in the Fund are described in the Prospectus and have not changed. An important risk to the Fund is credit exposure. That means if the market reacts negatively to the creditworthiness of an issuer relative to government securities, the Fund could experience losses in value. The Fund had below average credit exposure during the first 10 months of the Year. Ther Managers decreased risk substantially in January and February to the lowest level since inception in anticipation of the market turmoil caused by the new U.S. Federal administration.

These changes in credit exposure, and other risks experienced by the Fund, had no impact on YTM Capital's assessment of the suitability or investor risk tolerance. The suitability or investor risk tolerance, as described in the Prospectus is: The Fund is suitable for someone who is looking for a low risk, diversified portfolio of alternative investment strategies to hold as part of their balanced portfolio and who has a medium to longer term investment horizon.

Results of Operations

Performance

During the Year, Series A units returned 5.25% and Series F returned 6.23%. Differences in performance result from different fees being charged to each Series. The FTSE Canada Universe Bond Index ("FTSE Bond") returned 8.21% for the Year. The Fund's return is net of fees and expenses for professional management. Investors cannot invest in an index without incurring fees, expenses, and commissions, which are not reflected in index returns. All performance results are calculated on a total return basis in Canadian dollars.

The Fund underperformed the FTSE Bond because of the impact of interest rates. During the Year interest rates were volatile, but net beneficial top long only investors. The Fund had neutral exposure to interest rates during the Year and therefore did not experience the same type of volatility as the FTSE Index.

The Year was divided into two parts. From March to December, credit markets saw a slow grind tighter and the Fund posted positive, steady performance. The last two months were volatile and the Fund posted a small positive return.

Net Assets

The NAV of the Fund increased from \$145.6 million on February 29, 2024, to \$330.5 million on February 28, 2025. This change was composed primarily of net sales of \$178 million combined with positive investment performance that resulted in an overall increase in NAV for the Year.

Leverage

The Fund can create leverage by borrowing securities, borrowing cash, or by using derivatives to generate investment exposure that would otherwise not be available. The maximum permissible aggregate exposure created by leverage is 300% of the Fund's NAV. Leverage is calculated by adding together (i) market value of securities sold short; (ii) the amount of cash borrowed for investment purposes; and (iii) the notional value of derivatives positions used for non-hedging purposes, divided by the Fund's NAV. The Fund has received a partial exemption from the National Instrument 81-102 rule that limits short sales to 50% of a fund's NAV from securities regulators. The Fund is permitted short sell up to 300% of its NAV in "government securities" as that term is defined in NI 81-102.

ANNUAL MRFP

Management Discussion of Fund Performance for the year ended February 28, 2025

During the Year the Fund's leverage ranged from 191% to 304% of the Fund's NAV. The low end of the range occurred on February 7, 2025 and the high end was reached on June 11, 2024 when the Fund increased its exposure to credit. The primary source of leverage was physical short positions in Government of Canada bonds and a secondary, much smaller source, was cash borrowing. The proceeds of the short positions were used to purchase investment grade corporate bonds. The only type of derivative used during the Year was CDX for hedging purposes.

Portfolio Changes

The average maturity of the portfolio during the Year ranged from 1.2 years to 1.8 years, ending the Year at 1.4 years. The portfolio was diversified on a sector basis throughout the Year, with an emphasis on Financial Services holdings, which represented from 38% to 48% of the Fund's portfolio. The predominant credit rating of issues held by the Fund was BBB, with that allocation increasing from 65% at the end of February 2024 to 73% at the end of February 2025.

Recent Developments

Throughout much of 2024, Canadian investment grade credit spreads tightened, supported by strong investor demand and favorable economic indicators. However, in early 2025, spreads began to widen slightly due to renewed trade tensions, particularly concerns over U.S. tariffs on Canadian exports. This shift indicated a cautious market sentiment and a reassessment of credit risk.

Related Party Transactions

YTM Capital earns a management fee payable by the Fund for providing services to the Fund. The management fee varies for each series of units, as shown below. The management fee is calculated and accrued daily based on a percentage of the NAV of the series of units, plus applicable taxes, and is payable on the last day of each calendar month.

Series TA units
1.90% per annum
1.90% per annum
1.90% per annum
2.90% per annum
2.90% per annum
2.90% per annum
3.90% per annum

For the Year, the management fees earned, inclusive of applicable taxes, was \$2,434,388.

YTM Capital may also earn a performance fee from each Series of the Fund. The Fund pays YTM Capital a performance fee each calendar quarter equal to 15% of the net profit for Series A, Series TA, Series A-USD, Series F, Series TF and Series F-USD units, each subject to a high watermark. Unitholders in Series I units may negotiate a performance fee to be paid by the unitholder that is different than the one described above or no performance fee at all. The performance fee is calculated and accrued for each Series on a daily basis during each Performance Fee Determination Period and, with respect to an intraquarter redemption of units of a series, on the relevant redemption date.

YTM Capital earned \$2,593,891 in performance fees during the Year.

The Fund is responsible for all of its operating expenses, including legal, audit, IRC fees and expenses, and all other expenses incurred in the ordinary course of operations.

Notes:

- (1) This information is derived from the Fund's annual financial statements for February 28, 2025, February 29, 2024, February 28, 2023, February 28, 2022 and December 31, 2020.
- (2) The Fund commenced operations on June 24, 2019; as a result, financial highlights are currently available only from the date of commencement.
- (3) Net assets is based on the actual number of units outstanding at the relevant time. The increase/(decrease) from operations and distributions are based on the weighted average number of units outstanding over the financial period.
- (4) Distributions were paid in cash or automatically reinvested in additional units of the Fund, or both.
- (5) This information is provided as at period end of the period shown.
- (6) Management expense ratio is based on total expenses (excluding distributions, commissions and other portfolio transaction costs like interest expense and borrowing fees incurred for investment) for the stated period and is expressed as an annualized percentage of daily average NAV during the period.
- (7) The trading expense ratio represents total commissions and other portfolio transaction costs, including interest expense and borrowing fees, expressed as an annualized percentage of daily average NAV during the period.
- (8) The Fund's portfolio turnover rate indicates how actively YTM Capital manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a funds' portfolio turnover rate in the period, the greater the trading costs payable by the fund in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
